29th April 2016

King's Lynn Edward Benefer Way to Lynnsport Access Road

Update No. 2

The new access road works are progressing well. The current construction consists of the sub-base layer and base layer, with two membrane layers to increase the roads strength.

Road Construction Layers

All of the water retention cells under the northern car park have now been laid. These are now underneath a layer of sand.

Sand fill over Aqua Cells

The large drainage culvert which runs between Reid Way and Spencer Road is now being excavated. There is a temporary road to complete these works, which will form part of the new access road.

Excavator in the drain

The large culvert sections are being delivered to site. These are 1.8m internal diameter concrete pipes.

Delivery of culvert
