

## How to: Layers on MAGIC

### 1. Habitats Sites

- a) Use `Designations` → `Land-Based Designation`s → `Statutory`; and then go through the list and ticking each relevant box to add Habitats Sites data.

- b) Use the `Countryside Stewardship Targeting & Scoring Layer` → `Biodiversity` then ticking the appropriate boxes to add Habitats Sites data.

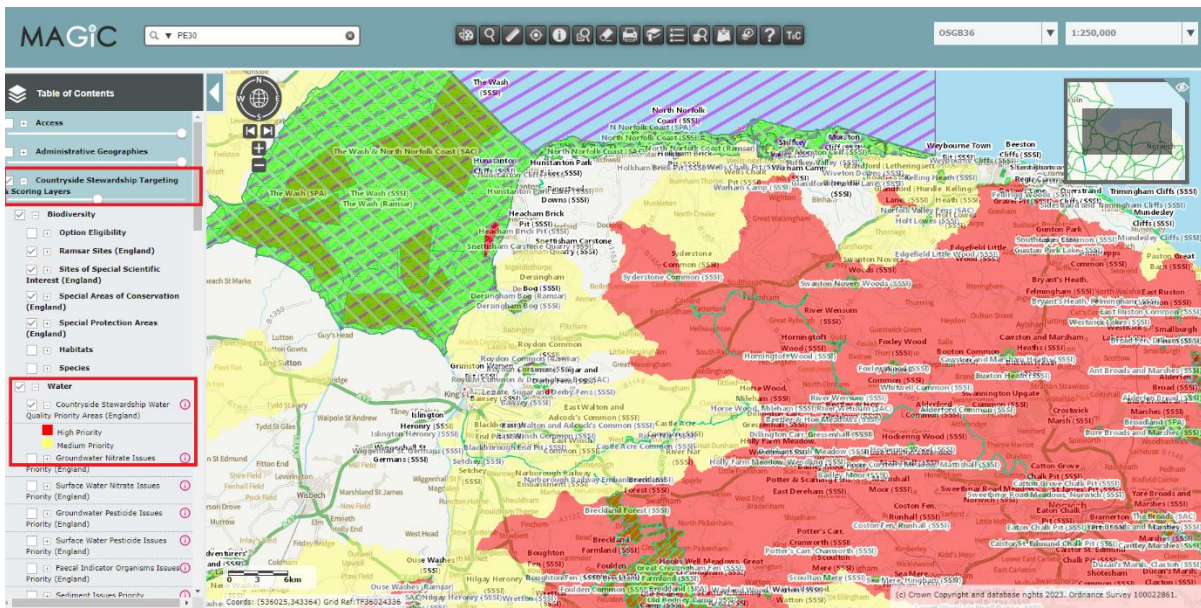

Note that the second route (b) does not contain SSSI Impact Risk Zones, pSPA or pSAC layers (among others).

### 2. Water catchments for Nutrient Neutrality

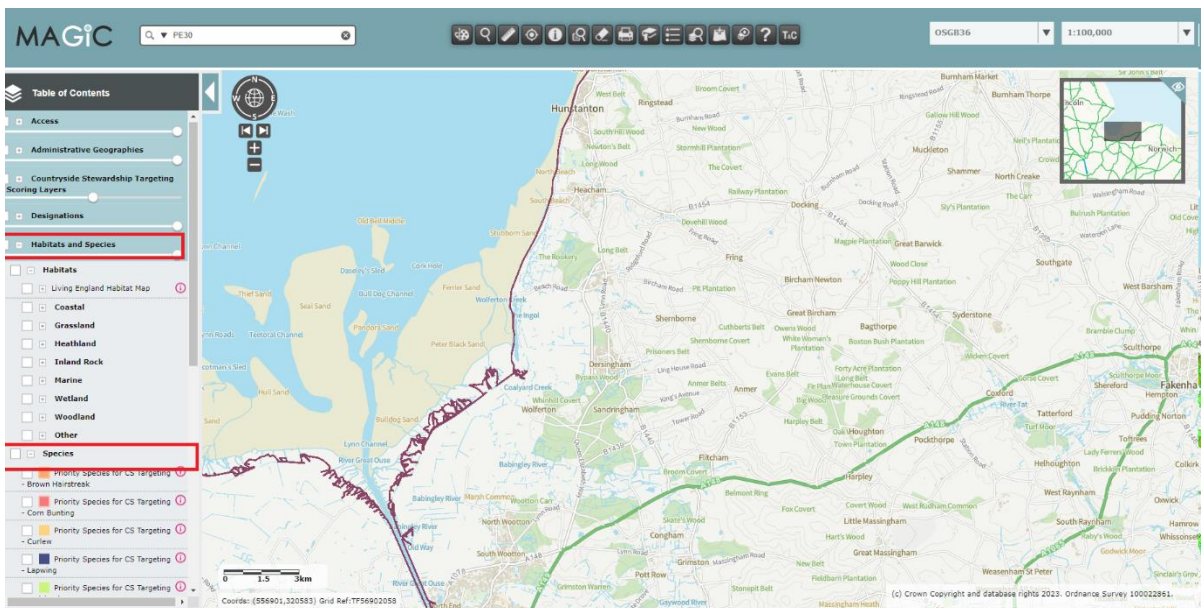

Use the `Countryside Stewardship Targeting & Scoring` layers to find `Water`. These layers show the catchment of the River Wesum SAC.

### 3. Habitats and Species

Use the `Habitats and Species` layers to find priority habitats information or species information.

a) Use the `European Protected Species Licensing`, `Great Crested Newt Class Survey Licence Returns (England)` and `Great Crested Newt Pond Surveys 2017 – 2019` to check the proximity of protected species.

Table of Contents

- Leaping
- Priority Species for CS Targeting
- Redshank
- Snipe
- Upland Breeding Bird Areas For CS (England)
- Birds
- Mammals
- Plants
- European Protected Species**
- Licensing**
- Granted European Protected Species Applications (England)**
- Amphibian
- Bat
- Cetacean
- Invertebrate
- Other Mammal
- Plant
- Reptile
