### Position summary

1. The staffing numbers reflect the Alive West Norfolk staff TUPE transfer to the Borough Council from 1st April 2025.
2. Voluntary turnover rate remains within the anticipated turnover levels.
3. Indicators in relation to the number of voluntary leavers from permanent roles and the number of starters to permanent roles should be read in isolation from each other due to the time lag between resignation of one employee and start date for a new employee, which often spans any particular quarter.
4. The average number of working days lost due to sickness absence by permanent employees is below the Q1 2024-25 figure of 2.64 days. HR are supporting proactive management by managers to address sickness absence issues during 2025/26.
5. Number of employees who have had a period of long term sickness in Q1 is below the Q1 2024-25 figure of 27. It is not a record of the number of employees who are absent due to long term sickness at that point in time.
6. The number of temporary staff will vary due to the temporary needs that occur, this number includes short term temporary staff, and also longer term fixed term contracts which also include out apprenticeships throughout the Council. These numbers also include Alive West Norfolk temporary staff who transferred into the Council.
7. The average number of working days lost due to sickness absence by temporary employees is impacted by movement within this part of our workforce (for example, temporary employees who had taken sickness absence and are leaving our employment to be replaced by employees who have not had absence, or employees who were previously temporary moving into permanent roles).
